ORGATEC 2018

Sennheiser presents flexible microphone solutions for conference centers

***Cologne/Wedemark, 23 October 2018* – A new level of business communication: Sennheiser will be presenting its innovative microphone systems for the meeting sector at Orgatec alongside Wilkhahn, a manufacturer of high-quality office and conference equipment. Visitors to the fair, held from 23 to 27 October, will be able to experience solutions including TeamConnect Ceiling 2: the audio specialist's new ceiling microphone ensures first-class speech intelligibility thanks to the adaptive beamforming technology. Sennheiser is also presenting TeamConnect Wireless, a flexible conference system for online meetings.**

TeamConnect Ceiling 2: Clear communication ensured by innovative ceiling microphones

Sennheiser's TeamConnect Ceiling 2 offers superior audio quality for voice and video conferencing. Like its predecessor, the new generation is installed virtually invisibly within the ceiling of the meeting room. This ensures that conference tables remain completely free of cables and microphones, allowing flexible usage of the space. The 28 omnidirectional microphone capsules inside the discreet ceiling array automatically focus on the active speaker in the room - regardless of whether they are seated or standing. This lets conference participants to move freely around the room, while speech transmission remains crystal clear and free from disturbing ambient noise.

Thanks to the adaptive beamforming technology, TeamConnect Ceiling 2 focuses the speaker automatically so they can move freely in the room.

Compared to its predecessor, the new ceiling microphone features a further optimized beam and an even easier installation and operation. Sennheiser's Control Cockpit software makes it easy to maintain and control the system remotely. The audio specialist’s software can be accessed via any browser-enabled device, which makes installation very easy. Sennheiser’s new ceiling microphone also supports the Dante™ network standard to facilitate integration into existing IP and Ethernet communication networks. Equipped with an analogue audio output and two digital Dante audio outputs for redundancy, TeamConnect Ceiling 2 can be connected to any conference system or digital audio network.

TeamConnect Wireless: flexible conference environments in every room

At Orgatec, Sennheiser will also present TeamConnect Wireless, its portable, wireless conference system. The microphone satellites can be set up quickly and easily in any room - and can therefore be adapted to suit a variety of meeting situations. Thanks to a wide range of connection options via Bluetooth, USB or 3.5 mm jack, participants can connect either via laptop, tablet or smartphone. The system is available either as tray set version with four satellites for up to 24 participants, or as tray M version, which has two satellites for up to 12 participants. As a complete solution that requires no AV expertise, TeamConnect Wireless makes online meetings much easier and more efficient.

The TeamConnect Wireless can be set up quickly and easily in any room - and can thus be flexibly adapted to different meeting situations.

Visit Sennheiser at Orgatec 2018 in Hall 06.1, Booth B088/C089 and experience the conference solutions of the future.

About Sennheiser

Shaping the future of audio and creating unique sound experiences for customers – this aim unites Sennheiser employees and partners worldwide. Founded in 1945, Sennheiser is one of the world's leading manufacturers of headphones, microphones and wireless transmission systems.
