Modus® Executive. 28 range

Smart yet casual.

In positions of responsibility, office and conference chairs are the last things you cut back on. Which is why the Modus Executive range is all about quality not quantity. It combines the exceptional comfort and stylish appearance of Modus with exclusive and prestigious features: seat and backrest are covered in flat cushions with extremely supple leather. With carefully stitched seams, they emphasise the slender shape and also lend the furniture a high-quality informal appeal. Whether as office, conference or cantilever chair, Modus Executive stands for a contemporary and dynamic management style. Despite all the variety offered in terms of function, features and style - all Modus models have one thing in common: their superb look and first-class ergonomics.

Modus Executive

Design: Klaus Franck, Werner Sauer and wiege, Fritz Frenkler, Justus Kolberg

Model 284/81

Seat and backrest with leather-covered flat cushions, polyamide armrests with embossed leather covering, bright chromium-plated aluminium frame

Sophisticatedly curved armrests that are pleasant to look at and touch: The outside is fully upholstered with a finely crafted leather covering. The seat bearer blends perfectly by repeating the distinctive design of the backrest which is open towards the top.

Modus Executive

In this range, designed for top-level demands on prestige, quality of features and comfort, the seat and backrest are upholstered with understated flat cushions made of fine leather. On the cantilever models, the upper edge of the backrest is straight. The complex crafting of the hand-sewn covers is not just pleasing to the eye and a sign of quality: as in all Modus models, the seat and backrest can easily be re-covered. This guarantees the chair has a virtually endless useful life and is very good value.
