Solis F. 190 range

Classical shapes.
Clever adjustment.
Comfortable
transparency.

Uncompromisingly classical shapes and superb comfort make the Solis F series stand out from the crowd. Designed for areas wishing to convey a transparent, progressive and innovative image. The F stands for frame and the distinctive structure of the seat and back which is created by its aluminium frame.

The appeal of precisely engineered metal, simple, functional shapes and complete transparency make Solis F an office chair like no other. So the astonishing comfort it offers is all the more remarkable. The automatic synchro-adjustment allows for a wide opening angle and can automatically lower the front edge of the seat. It perfectly complements the ergonomic features of the transparent high-performance fabric captured by the side profiles of the frame.

Solis F

Design: wiege

Model 196/4

Without armrests, seat and backrest in transparent high-performance fabric, frame aluminium coated.

Solis F is available with two backrest heights; a headrest is an option in the high backrest version. Height-adjustable backrests are also optional. All the armrests and headrests are leather upholstered. Craft-stitched, high-quality leather cushions for the seat and backrest are available depending on preference.
