

OCCO. 222 range

Appealing variety in one design language.

Occo can help create different atmospheres in all sorts of meeting spaces and convey a consistent, clear design at the same time. The common denominator is the distinctive seat shell that fluidly integrates the seat, armrests and backrest. The open section at the back makes the chair appear super light and integrates its stacking capability (four-leg chairs with metal frames). The combination of the shape and material thicknesses makes the back exceptionally flexible and comfortable too. These features are what the range owes its name to. Viewed from the front and back it looks like an O and resembles a double C from the side.

Four frame types (four-leg chair in metal and solid wood, four-star base on glides and five-star base on castors), six shell colours and four types of cushioning respond to virtually all functional and design requirements.

Occo
Design: Jehs+Laub

Model 222/31
white with frame chrome plated
and seat cushion

One of the most important tasks when designing modern office concepts is to create attractive places where people want to meet up, interact and collaborate. In conference rooms, open-plan meeting areas or canteens: Occo combines comfort, versatility and a vast range of design options with an identifiable design language.
