

## Timetable™ Smart.

614 range

The Timetable Smart follows the Timetable principle and taps into another application: transportable and dynamic furnishing of multipurpose areas, such as versatile training rooms, project offices, canteens or meeting places. We only use table tops made of tough boards (60x150 cm, 75x150 cm (23<sup>5</sup>/<sub>8</sub>"x59", 29<sup>1</sup>/<sub>2</sub>"x59")) coated with melamine resin with plastic lipping in the same colour. The frame has an extremely hardwearing swivel mechanism (which does not cause the foot section to rotate) with integral storage buffer. The table top is locked both horizontally and vertically. The locking mechanism is released by simply pulling out the horizontal draw rod and pivoting the table along its horizontal axis. The wide frame with less of the table protruding at the sides, gives two chairs enough space between the foot sections, so that the table offers enough legroom for four people sitting opposite one another.

Another bonus is that the table's sturdy design allows sophisticated power supply solutions – either as standby options for temporary work spaces, or with permanently integrated multi-media technology, as a flexible facility for conference and training areas.

Stuttgart

The Timetable tables range is ideal for areas requiring compact table formats. As an option, the edges and the surfaces of the flip-top tables can be perfectly matched with the table top designs offered by the Confair folding table and Timetable Shift with its distinctive rubber edge.

Practical and attractive: the Timetable Smart table connectors for form-fit connection of the ends and sides.

If Timetable Smarts need to be fitted with multi-media equipment and a power supply, practical accessories such as cable portals, covers and retractable cable channels, holders for cables and clips to guide them around the uprights are available.
